# 1-TOUCH LASER PHOTO™

**A full-featured software package designed to make it easy to produce high-quality photo engravings. From Universal Laser Systems.**

## HOW IT WORKS

### Crop. Process. Print.

Open the file you want to engrave in 1-Touch Laser Photo.

Adjust the height and width according to your material size.

Then select the material. Choose from an expanded list of materials. 1-Touch will automatically reverse the image depending on the material.

That's it and it's ready to **Print**.

## Print Preview Mode

Want to see what your photo looks like on wood? Marble? Glass? Use 1-Touch Laser's Print Preview feature to find out without even turning on your laser. Choose from dozens of included simulation backgrounds or use your own!

Compared to competing photo preparation software, 1-Touch Laser Photo is the easiest to use, uses the most advanced processing algorithms and produces the highest quality images. If you want to engrave photographs, you need 1-Touch Laser Photo.

**To order 1-Touch Laser Photo from Universal Laser Systems, call 1-800-859-7033 (1-480-483-1214) or visit www.ulsinc.com/products/1-touch-laser-photo/ to download a free 30-day trial of 1-Touch Laser Photo.**
